

Route to Transformation of Educational Institutions through a Whole Institution Approach to Sustainability

(SUStainability on EDucational Institutions)

Programme: Erasmus+, Forward - Looking

Agreement Number: 101087440 – SUSEDI

THE SUSEDI PROJECT

“Route to Transformation of Educational Institutions through a Whole Institution Approach to Sustainability” (SUStainability in EDucational Institutions)

If you are an educator or management or administrative staff in an educational institution, this sustainability project is tailor-made for you!

AIM

The “SUSEDI” project aims at the transformation of Educational Institutions (EIs) using the Whole Institution Approach (WIA) to sustainability.

This will be primarily achieved by providing training to the EIs’ personnel on the “GreenComp” competences and giving them the opportunity to get certified with ISO17024 on that competence.

OBJECTIVES

The main objectives of the project are:

1. To develop a Systemic Framework for WIA (Whole Institution Approach) to Sustainability including (i.e., areas of work such as the SOCIAL, PEDAGOGICAL and ORGANISATIONAL pillars) as well as domains within those pillars.
2. To develop and certify (with ISO17024) the sustainability competence of the personnel of Educational Institutions (management teams, educators and administrative staff) based on the Green-Comp, through the use of an Open Educational Resource and a digital assessment tool.
3. To develop the “Route Map for the Transformation of Educational Institutions into WIA to Sustainability” guide that will include steps to transformation and proposed activities for the pillars and domains of the Systemic Framework for WIA to Sustainability.
4. To train and certify (with ISO17024) transformation agents who will support Educational Institutions in their transformation into the WIA to sustainability (and develop an open educational resource for them too).
5. To develop a self-assessment tool that will be used by Educational Institutions to assess their current situation as far as WIA to sustainability is concerned either on their own or with the support of the transformation agents.

- 
6. To develop a standard aligned with ISO for the certification of Educational Institutions' transformation through the WIA to sustainability at three different levels: "Awareness", "Into Action", and "WIA to sustainability".
7. To transform and certify the institutions of the consortium on one of the certification levels developed, according to their current situation.
8. To develop an alliance of Educational Institutions adopting WIA to sustainability or being in the process of transformation through WIA to sustainability.
9. To promote the certification standard to other Educational Institutions inside and outside the countries of the consortium.

We would love to see you participating in any of the following project activities:

- Trainings “Development of the Sustainability Competence of Personnel of Educational Institutions and Certification Through ISO17024” to develop your sustainability competence.
- Certification of your sustainability competence with ISO17024
- Preparation to become a transformation agent for your Educational Institution and lead your Educational Institution in adopting the Whole Institution Approach to Sustainability.

INNOVATIVE ASPECTS OF THE PROJECT

1. SUSEDI translates the “GreenComp” competence into learning outcomes!
2. SUSEDI offers 3 distinct certification schemes, for both individuals and institutions!
3. SUSEDI transforms holistically Educational Institutions into sustainable institutions using the WIA to sustainability!
