Announcing Our New E-Learning Platform!

<https://elearn-susedi.projectsgallery.eu/>

We are excited to announce the launch of an innovative online asynchronous e-learning platform on MOOC, designed to enhance the sustainability competence of educators, leaders, and administrative personnel in educational institutions. SUSEDI's comprehensive platform consists of 12 online lectures that align directly with the Green Comps Framework, divided into four main areas with three competencies per area.

Indicatively the areas corresponding to the 12 lectures are the following.

1. Embodying Sustainability Values: Valuing Sustainability, Supporting Fairness, Promoting Nature
2. Embracing Complexity in Sustainability: Systems Thinking, Critical Thinking, Problem Framing
3. Envisioning Sustainable Futures: Futures Literacy, Adaptability, Exploratory Thinking
4. Acting for Sustainability: Political Agency, Collective Action, Individual Initiative

Upon logging into the MOOC platform of SUSEDI, educators and learners will find these four areas represented in distinct link boxes. Each box leads to a dedicated page for each lecture, providing detailed information about the lecture, including learning outcomes, bibliography, and more. The lectures employ i-springs' Text-To-Speech (TTS) technology, allowing learners to listen to lecture notes while reading the slides. All content is available in multiple languages, including Spanish, English, Greek, Italian, and Polish.

SUSEDI's MOOC platform offers flexibility with asynchronous access to lectures, enabling learners to engage in self-directed learning over 14-21 hours. The lectures include quizzes, exercises, and opportunities for asynchronous conversations with a community of practice. Additionally, trainers will be available to support learners via email and chat, ensuring that help is always at hand.

Each lecture adheres to a standardized template structure, ensuring a consistent and recognizable format. Distinct coloration for each of the four areas—such as yellow hues for Embracing Complexity—enhances visual coherence, corresponding to the GreenComp colors.

Get Certified with ISO 17024!!

We invite educators to complete the entire lecture series to get certified under the CERTIFICATION SCHEME ISO 17024. This certification not only validates your expertise in sustainability but also enhances your professional credentials. Don't miss this opportunity to elevate your skills and contribute to a sustainable future! Explore the platform today and start your journey towards sustainability excellence!
