

11th Press Release

SUSEDI Presented at the CY 2026 EU Presidency Conference

The SUSEDI project was proudly presented at the CY 2026 EU Presidency Conference, highlighting the project's contribution to advancing sustainability in education through practical and institutional transformation approaches.

During the conference, MMC's Managing Director had the honour of participating in a dynamic discussion panel focused on bridging the gap between policy vision and real implementation. The discussion explored how the Whole Institution Approach (WIA) can be effectively connected with Education for Sustainable Development (ESD), creating meaningful and longlasting impact across educational institutions.

Drawing on the experience and outcomes of the SUSEDI project, key insights and lessons learned were shared with participants, emphasizing the importance of practical tools and collaborative approaches in supporting sustainable transformation. Particular attention was given to the SUSEDI Route Map Guide and the Self-Assessment Tool, both developed to help institutions translate sustainability commitments into concrete actions and measurable progress.

The conference provided an important platform for dialogue and exchange among policymakers, educators, and sustainability stakeholders, reinforcing the growing need for integrated and action-oriented approaches to sustainability in education.

Through its participation in the CY 2026 EU Presidency Conference, the SUSEDI project continues to strengthen its role in promoting systemic change, empowering institutions to embed sustainability into their strategies, practices, and culture. The event also created valuable opportunities for networking, collaboration, and the sharing of innovative ideas that can further support the transition toward more sustainable and resilient educational ecosystems.
